

# SAVE QUEENSLAND HEALTH

**I'm a health worker and I live in your neighbourhood.**

I'm putting this in your letterbox because I feel the state government is damaging Queensland's Health and putting the care of patients at risk.

Sometimes there are moments in life, when you can no longer stand by and let politicians make decisions that not only do you disagree with, but which you believe are harmful for you, your family, your community and your state.

This is one of those moments for Health Practitioners – the people who are the backbone of the health system. We are physiotherapists, social workers, scientists, radiographers, pharmacists, occupational therapists and speech pathologists to name a few of our professions.

We are standing up to defend our health system for all Queenslanders.

We are fighting to maintain the investment in the healthcare system which is needed to ensure Queenslanders continue to have a world class health system.

Health Professionals are the people who keep our health services running every day. It's not an easy job. But we know how important good quality health services are, no matter where you live in Queensland. We are committed to high standards of patient care.

I ask for your support in ensuring we have a strong health system by paying health professionals properly and ensure we have enough resources to help you when you or your family and friends need us.
